

Pipe-Pal Limited Warranty

Pipe-Pal Consumable Warranty and Liabilities Disclaimer:

Consumable items carry no warranty other than to be free of defects upon arrival. See exclusions and limitations below.

Exclusions and Limitations:

Products manufactured by anyone other than Pipe-Pal are subject to the conditions of the warranty supplied by the original equipment manufacturer. When applicable, this information will be disclosed on their respective web pages.

Products co-branded with another company may sometimes carry a warranty less than 90 days. When applicable, this information will be disclosed on their respective web pages.

Damage to a product caused by improper use, dropping, abuse, etc, will void the warranty.

Conduit spacers are not to be used as a supporting means. Proper supports/straps for conduits/pipes, must be used in conjunction with conduit spacing products. Pipe-Pal Tools & Accessories Inc. assumes absolutely no liability for misuse/improper use of our products.

Laser Systems require proper safety precautions be used at all times when operating/using laser devices. This includes use of controls and PPE outlined on our Laser safety information. It is acknowledged that safety information has been read prior to operation and proper safety guideline/controls have been put in place and have also been utilized prior to operation.

Our products contain small magnets and are to be kept out of reach by children at all times.

**Laser unit is not a toy and emits radiation. Laser is to be kept out of reach by children at all times. **

Consumable items carry no warranty other than to be free of defects upon arrival.

Replacement only on manufacturing defects. If purchased from a wholesale or distribution outlet, original packaging, purchase receipt and product must be included with return. If it is deemed product has been damaged other than manufacturing defect, return/replacement warranty will be null and void.

Warranty shipping will be at purchasers cost, unless it is deemed return is a result of defect occurring during the manufacturing process.
