Tools & Accessories Inc.®

Introducing the industries first **Laser System** designed specifically for Rack/Conduit layout & installation!

Laser Safety Information. Please read before operation.

Not a supporting means. Clamps still required.

Patent Pending - US 63/140,699

Do not point the laser at pets, people or vehicles (cars, planes, forklifts, etc.).

Always use properly rated safety glasses when operating laser!!!!

Never stare directly at the beam or at it's reflection.

Do not magnify, use optical amplification devices or point beam at mirror like surfaces.

Do not let children play with the laser (adult supervision required). This is not a toy!

Turn off the laser unit when not in use.

Only use laser in conjunction with it's intended use.

When using laser, set up and enforce proper control zone standards to minimize risk of outside parties entering zone.

Specifications:

Laser Color: **Green**

Laser Wavelength: 532nm

Laser Output power: <5mW

Light Style: Beam light

Power Supply: 2 x AAA batteries(not included)

Laser Range: Max 3,000 Ft.

Switch: Latching Button Operation

Class: Class 3A

Operation Voltage: 3.0V

Output Wave: Continuous wave

Body Material: Metal

Product Weight: 5.89 oz

Dimensions: 15.7 cm x 1.4 cm / 6.18" x 0.55" (L x Dia.)

Body Color: Black

Output Power: <5mW Output Wavelength 532nm Press and Hold On/Off Button Battery: AAA 1.5V x 2 Alkaline (not included)

Age Restrictions!: 12 and Up. *Adult Supervision Required

Weapons of Mass Production
